DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 18-21, drawn to a product of a capacitor, classified in class 361, subclass

313.

II. Claims 22-25, drawn to a process of making a capacitor, classified in class 29,

subclass 25.41.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups II and I are related as process of making and product made,

respectively. The inventions are distinct if either or both of the following can be shown: (1) that

the process as claimed can be used to make other and materially different product or (2) that the

product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

In the instant case, the product of Group I can be made by a materially different process, such as

one that does not involve any step of cutting, as required by Group II.

3. Because these inventions are distinct for the reasons given above and have acquired a

separate status in the art as shown by their different classification, restriction for examination

purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37 CFR

1.143).
